

## Handrail checklist

The points listed serve as a guide to completing the framework data for planning illuminated handrail systems, they are also the basis for us to create cost estimates and offers. Based on this list and our data sheet (download from [www.leccor.de](http://www.leccor.de) > LED handrails), we recommend all of them in advance collect existing information and send it to us for evaluation or assessment. If you have any questions, please do not hesitate to contact us by telephone on +49 (0) 791-47077 or by e-mail at [info@leccor.de](mailto:info@leccor.de).

No	to clarify	your notes
1	budget, investment ?	
2	Do you have any plans/drawings ?	
3	which kind of profile for handrail U42, U48, U60, U60x40 and so on ?	
4	overall length of handrail ?	
5	Are there angles, mitres, arcs, radii?	
6	Installation handrail inland or near to the sea ( < 60 km) ? L304 or L316	
7	surface (polished, glass bead blasted, powder painted RAL/DB)	
8	kind of installation (pillar, wall or balustrade) ?	
9	where is connection Leccor - metal worker (sword, wall support or so on)	
10	specifying kind of wall support, pillar	
11	ground - kind of material	
12	location of power supply unit (external / internal)	
13	distance power supply unit to handrail length of cable (up to 30 m possible)	
14	access electricity (position, amount)	
15	light requirement, prescribed values in lux	
16	What other light sources are available?	
17	Floor covering (material, color, texture, degree of reflection, and so on)	
18	symmetrical / asymmetrical light cone	
19	what color of light is desired (3000k warm, 4000k neutral, and so on)	
20	possibly control, dimmer (DALI) provided?
